

Autodesk Vault Training Course

Course Overview

Course Length: 4 Hours

- 4 hours of instructor-led training delivered across multiple sessions
- Remote training delivered over MS Teams
- Sessions are recorded and download links are provided for future reference
- Suitable for 1–3 participants
- Scheduling can commence within 7 days of order confirmation
- Flexible session planning to suit project deadlines and team availability
- Private course content tailored to your AutoCAD Electrical workflows and project requirements
- Includes a Certificate of Completion

This Autodesk Vault Training Course is designed for Autodesk Vault Basic or Professional users and administrators looking to use Autodesk Vault Basic Functions with Autodesk AutoCAD and/or Autodesk Inventor.

By the end of the Autodesk Vault Training Course, you will get a good understanding of how to use features found in Autodesk Vault Basic or Vault Professional and best practices for managing files, data and properties within Vault.

For users who are upgrading to Autodesk Vault Professional, consider the Autodesk Vault Professional Training Course or for new Vault Professional environments, combining this Vault Basic course with the Autodesk Vault Pro Course for bundled Vault training.

Prerequisites

No experience in Vault required. Experience with using CAD Software is beneficial.
